

Geovariances

Jean-Paul Roux was appointed as new Chairman and Managing Director

Geovariances, the global provider of advanced geostatistics-based solutions, today officially announces that Jean-Paul Roux has been appointed Managing Director and Chairman of the company on April, the 12th of 2018.

Jean-Paul Roux has joined Geovariances in 2008 as Sales and Marketing Director after holding a similar position with several software companies. With his successful business development background, Jean-Paul Roux is willing to lead Geovariances into a new era where customers will be put at the heart of the company's development strategy while developing a customer-focused culture. Opening new Geovariances' offices abroad is one step in this direction.

Jean-Paul has taken over from Olivier Bertoli who recently left the company.
